

Solutions Overview

Why Intervise?

Capabilities

Overview

Intervise is a small business that provides best value IT professional services in the areas of Information Analytics, Custom Applications Development and Task Based Technical Services from our regional offices in Rockville, MD, and Raleigh, NC.

Why Intervise

Intervise brings a deep understanding of current business methods and practices along with extensive practical application and scientific understanding in Semantic Web.

- ❖ Intervise recently developed natural language ontologies to facilitate interoperability and intelligent search capabilities for the Environmental Protection Agency.
- ❖ Intervise recently developed Feast™, a unique Semantic-based information management tool for data analysis which provides support for visualization, transformation, data source integration and asynchronous operations and is ontology agnostic.
- ❖ Intervise maintains intellectual capital that is advancing science in information analytics and alignment in Semantic Web technologies and is active in the Semantic Web/Open Source community.
- ❖ Intervise subject matter experts worked with the W3C specification committee in the creation of the OWL-2 profile for EL++.
- ❖ Developed internally, the Intervise Semantic Web Implementation Methodology (SWIM) has been endorsed by the Massachusetts Institute of Technology Research Establishment (MITRE) and the National Institute of Standards and Technology (NIST).
- ❖ Intervise's Chief Technology Officer served as a lead architect for Blackbook, the standard web application framework for data analysis.
- ❖ Intervise has relationships with several leading universities including Villanova where our CTO teaches graduate level courses in Semantic Web and Cloud computing.

Additionally, Intervise provides strong project management experience with a thorough understanding of government policies, procedures and recognized business practices which will allow us to execute properly on multiple and various projects. By utilizing proven methodologies, Intervise develops solutions that allow the expansion and thorough management of client data.

Contract Vehicles

- ❖ MOBIS – Contract #: GS-10F-0190U
- ❖ EPA BPA #BP10H001222 for Terminology and MetaData Services Support
